BitradeX

How a cryptocurrency exchange makes (a lot of) money

Global trading in cryptocurrency derivatives totaled \$85.7 trillion in 2025, with an average daily trading volume of \$264.5 billion.

01 • FEE REVENUE

Rate

Every time someone buys or sells a digital currency, they pay a small fee to the brokerage firm. Imagine that with 2 million people doing this every day.

02 • WHEN THEY BUY

Spread

Bitradex has access to the best prices on the market. It buys assets at the lowest prices, resells them at a markup, and makes a profit.

03 • SERVICES

Hold

When you buy a digital currency and leave it on HOLD (stored), the brokerage firm has access to trade those assets.

In our case, BittradeX pays you well for that if you choose to leave it in circulation.

Binance.

The market giant has shown that it's possible.

The world's largest exchange demonstrates the scale of the opportunity. BitradeX is following the same path with proprietary AI, its community, and by building momentum.
